Featuring

<u>Steven Bell</u>
Keynote Speaker

Keynote Address: *Riding the EduTech Surge: Taking a Balanced Approach*. New educational technologies are emerging at a rapid pace. How do we know which ones are likely to improve our pedagogy to advance the library information literacy initiative? Integrating learning technologies into our instruction activity should result from a thoughtful design process to provide students with an engaged, productive learning experience. In this presentation **Steven J. Bell, Associate University Librarian at Temple University and ACRL past-president,** will lead a conversation about approaching the integration of technology into instruction as a design process guided by student learning outcomes. Let's make sure we're choosing and using learning technologies that help our students succeed academically.

The Information Literacy Round Table of the South Carolina Library Association Presents

iTeach: An Information Literacy Workshop

Workshop: *Flip Out with Screencast-O-Matic: Using screencasting to create a flipped classroom.*

This two-hour workshop will introduce the newest educational technology trend called "flipping the classroom." You will learn the basic principles of the flipped classroom as well as gain hands-on experience creating an online tutorial using Screencast-O-Matic.

Presenter: Dana DeFebbo, Associate Professor, Systems Librarian - The Citadel
